CAREER SUMMARY:

Computer Science Engineering (IoT specialization) student with hands-on experience in web development and machine-learning projects. Skilled in building practical applications like crowd-management systems, automation tools, and prediction models. Strong problem-solving mindset with consistent academic performance.

EDUCATION:

Lokmanya Tilak College of Engineering, Mumbai
B.E. in Computer Science (IoT & CSBT) | 2024 – 2027

MSBTE Diploma in Computer Engineering, Mumbai
Aggregate: 74.97% | 2022– 2024

SSC 10th Standard
Percentage: 83.20% | 2020

PROJECTS:

Nashik Kumbh – Smart Pass Portal (Tech: HTML, CSS, JS, Flask)

- Developed a smart-pass prototype for managing pilgrim flow during Kumbh 2027. Built modules for pass registration, identity mapping, and QR-based verification. Designed a clean, responsive interface and optimized the validation workflow for on-ground volunteers.

AI Desktop Assistant (Python)

- Voice-controlled desktop assistant for task automation (searching, opening apps, file management).

House Price Prediction (Python, Flask, ML)

- Built prediction model using Ridge Regression with Flask backend.

Pharmacy Management System

- Application for medicine stock, customer records, and billing management.

SKILLS:

- Programming: Python, C, SQL
- Web Development: HTML, CSS, Bootstrap
- Core CS Subjects: DBMS, OS, Computer Networks
- Tools & Platforms: VS Code, Jupyter Notebook, Google Colab, n8n Automation

INTERNSHIPS:

Web Development Intern (Diploma Period)

- Designed responsive pages using HTML, CSS, Bootstrap.
- Assisted in developing front-end features for live projects.

CERTIFICATIONS & ACHIEVEMENTS:

Certified in AI/ML Skills (Edunet Foundation).
Completed a Web Development Training Program (HTML, CSS, JavaScript, Bootstrap) with hands-on project experience.
